

IRELAND'S MOST AUTHENTIC

SINCE 1882

**KINGSCOURT**

— BRICK —

CRAFT BRICK MAKERS

# AN UNRIVALLED HERITAGE

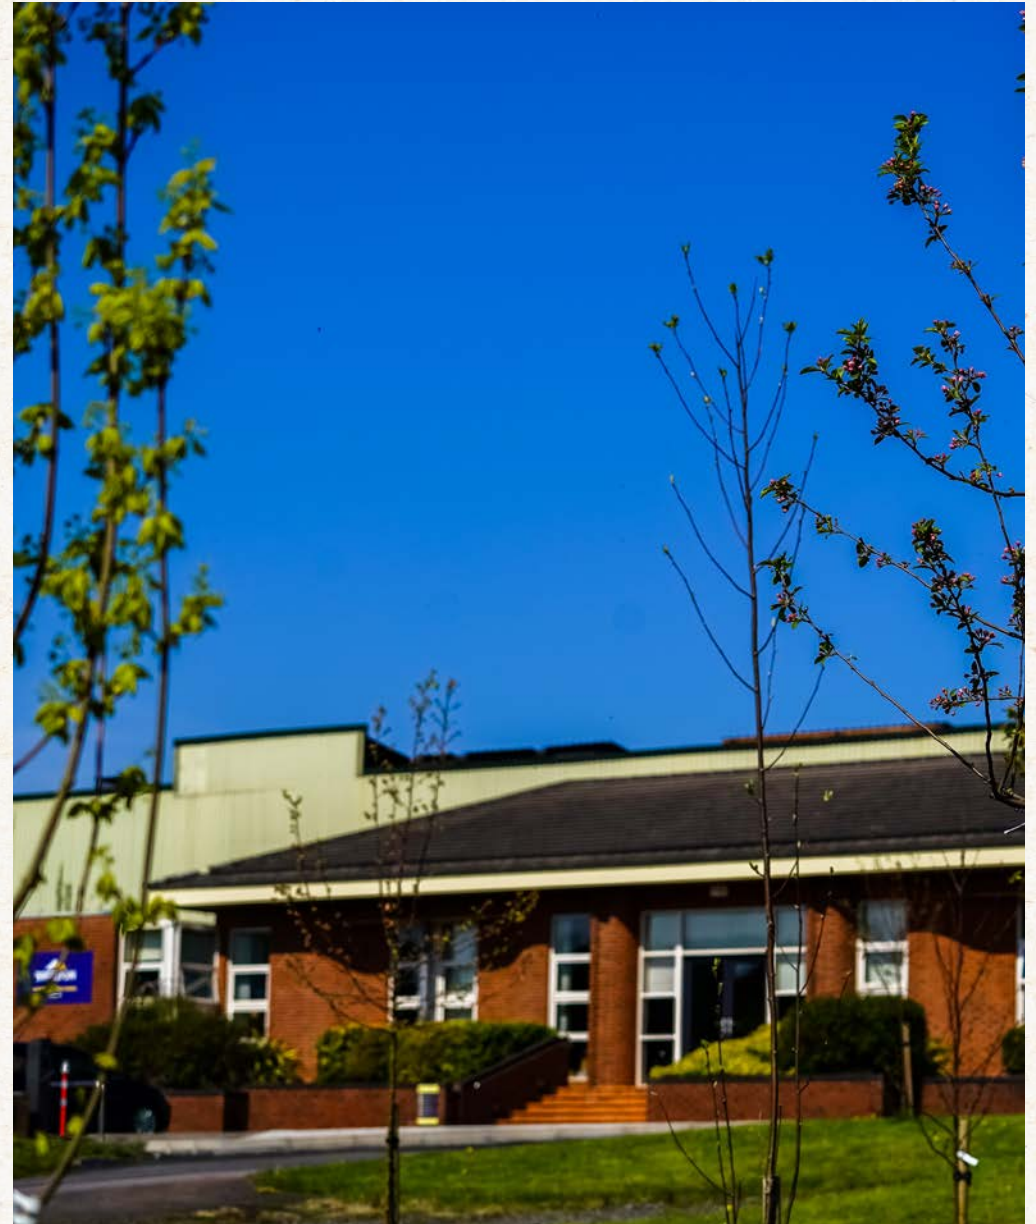

**Kingscourt Brick is one of Ireland's largest and most trusted providers of construction materials, based in Kingscourt, Co. Cavan, Ireland.**

## Our heritage

The Kingscourt Brick range comes to you with our own legacy, forged through our homegrown experience of more than 140 years' brickmaking.

Made from locally sourced Keuper Marl Clay, and distributed throughout Ireland and the United Kingdom, our bricks are strong, durable and attractive. A perfect balance of aesthetics and function. We've created our range to let you be as flexible as possible in your design, without skimping on quality.

And like every brick we make, each one's the product of our care, dedication and dexterity. The Kingscourt site has been making bricks since 1882, and is now Ireland's last remaining brickworks.

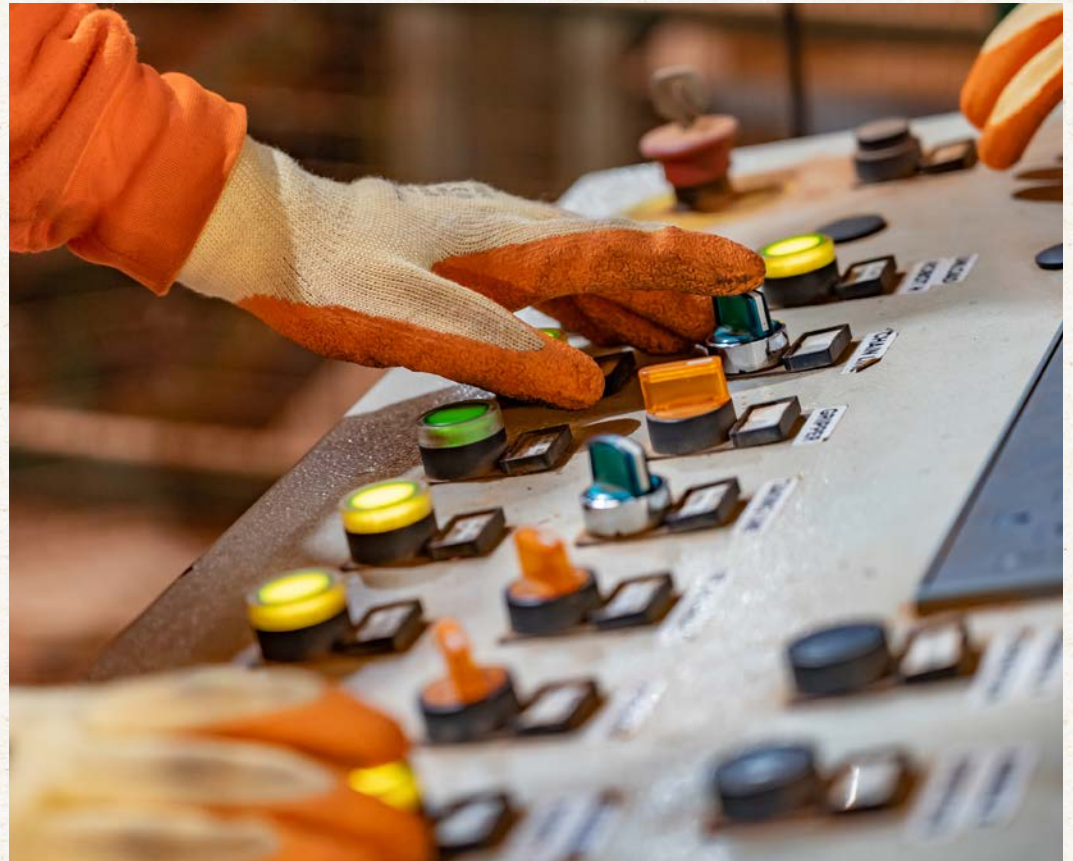

# QUALITY YOU CAN COUNT ON

## Building on our expertise

Our modern brick factory naturally complies with the industry's latest environmental, quality and health and safety standards, as do the bricks it produces. We comply fully with all National and European Environmental and Safety legislation, and are accredited to ISO 45001:2018 Health and Safety, ISO 14001:2018 Environmental Management System and ISO 9001:2015 Quality Management System and by the National Standards Authority of Ireland.

Our bricks are CE marked which means that they have been manufactured and tested to meet specific technical standards and conform to EU regulations. This includes requirements related to the strength, durability, and quality of the bricks.

# THE KINGSCOURT BRICK DIFFERENCE

## A first class product and partnership

▼

Kingscourt bricks are made of the highest quality, a product of care, dedication and skill, perfectly balancing aesthetics and practicality. Our secret is the locally-sourced keuper marl clay that gives them technical superiority and makes them strong, durable and attractive - enabling us to create a range that gives you design flexibility without having to compromise on quality.

## All the bricks you need

▼

Our high-quality clay bricks come in a wide range of colours and textures, with a choice of unique looks including rustic, weathered and tumbled for a more traditional appearance. Most are available in two sizes, 65mm and 73mm, together with a range of brick slips - and we can offer mixed loads so you can economically add a variety of looks to your development.

## A partnership you can rely on

▼

That's just one way we work closely with our customers to offer you more. By forming a true partnership, we can support your business and help you work more efficiently, making sure you have the bricks you need with just in time delivery, nationwide coverage and comprehensive technical support.

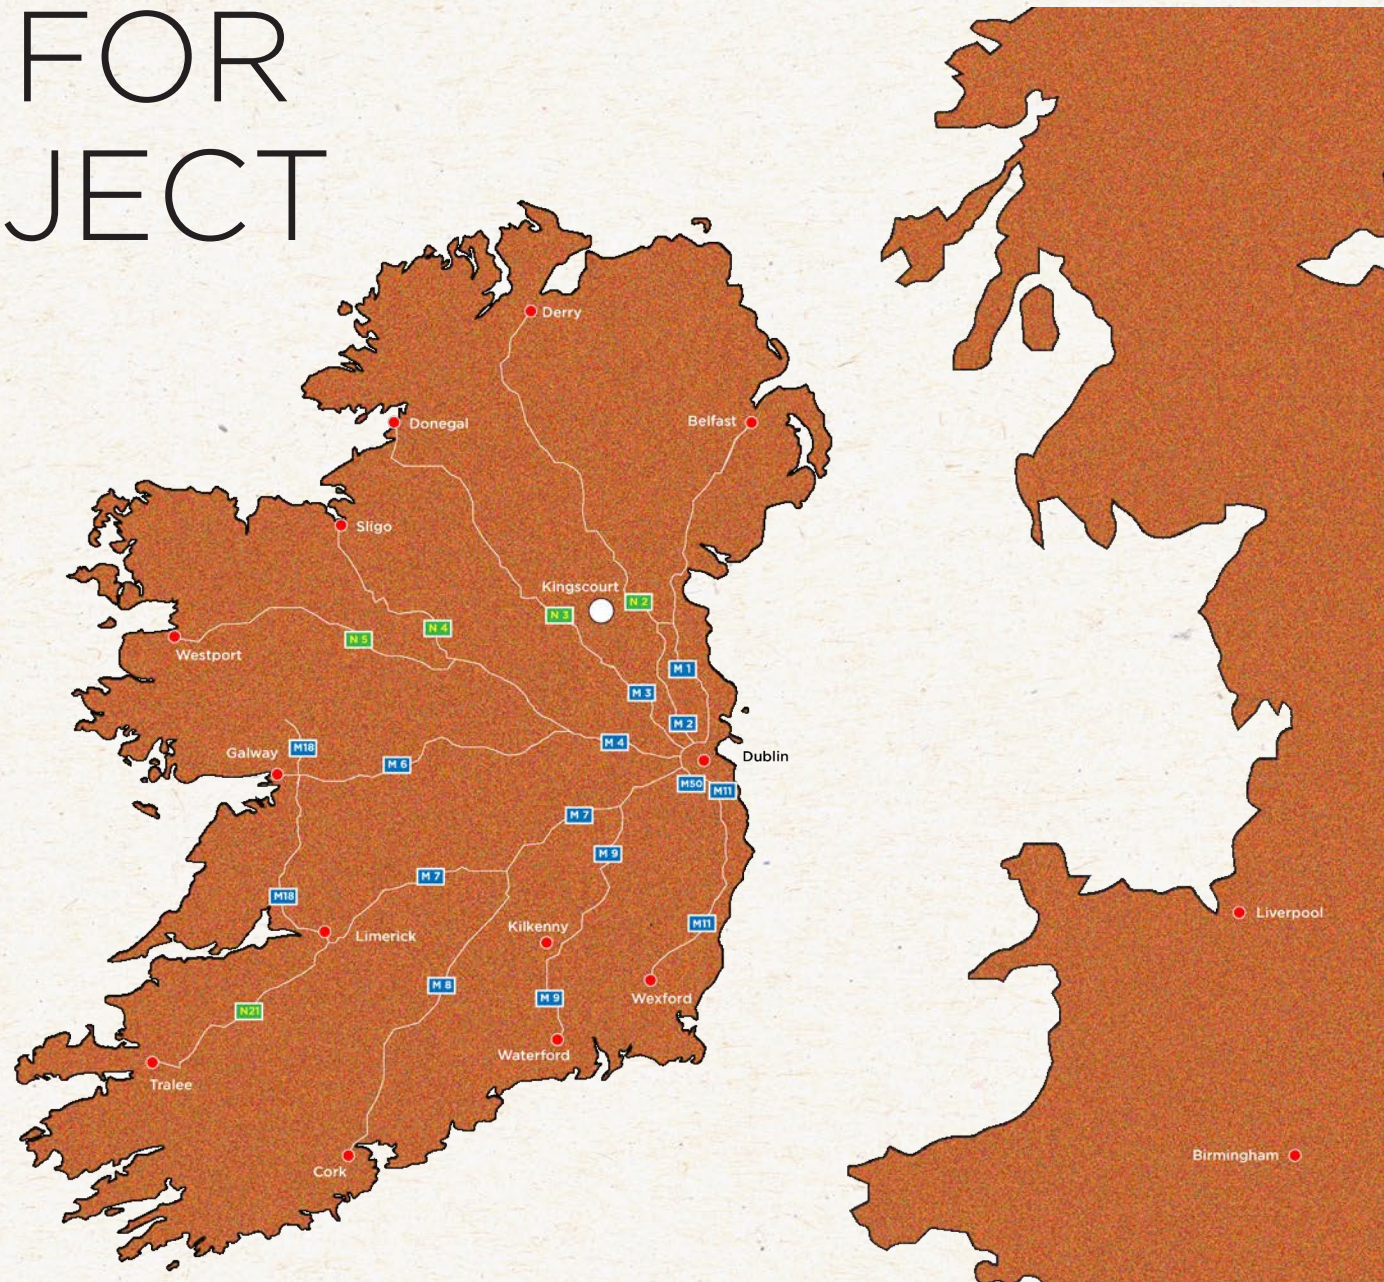

# ACCESSIBLE FOR EVERY PROJECT

## Our manufacturing plant at Kingscourt, Co. Cavan

With our manufacturing plant based in Kingscourt, Co. Cavan, Kingscourt Brick has a nationwide reach. This allows for efficient, cost-effective and low emission transport from our site to yours.

It also allows our people to quickly respond to on-site requirements and be available for project meetings, wherever the location. The firm also has an experienced team in the United Kingdom to serve our projects there.

In conclusion, the superb road network and connectivity means faster and more effective mobility by bringing our products and people closer to our clients and making places more accessible to one another. Kingscourt Brick is located just over one hour from Dublin City Centre, under three hours to the cities of Galway and Limerick and four hours to Cork City Centre - all of which via motorways and national routes.

# SUSTAINABILITY

## Making A Material Difference to our Planet, People and Places.

Together, we can all drive positive change by focusing on sustainability in all aspects of our business practices. At Kingscourt Brick, in line with our company strategy to sustain, expand and optimise our business, we've set out an overarching sustainability framework, underpinned by fundamental operating principles, to focus our efforts on 'Making a Material Difference to our Planet, People and Places.'

### Planet

Our aim is to make a positive material difference to the environment. To achieve this our approach is to address a number of key environmental focus areas such as carbon and energy reduction, responsible resource use, waste reduction and creating a positive impact on nature and biodiversity.

### People

Our aim is to make a positive material difference to society. To achieve this we focus on areas that include developing and empowering a diverse and talented workforce. We will continue to improve the health, safety and wellbeing of our employees and providing a positive impact on the communities in which we operate.

### Places

Our aim is to make a positive material difference to the built environment. To achieve this our approach focuses on key products and services that deliver higher performance, resource-efficient buildings and resilient, low impact infrastructure. We are committed to developing innovative solutions to help customers mitigate impacts of climate change.

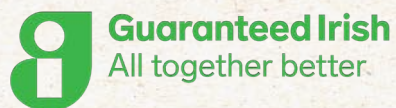

**Kingscourt Brick continues our strong relationship as silver members with The Irish Green Building Council.**

Kingscourt Brick works with the IGBC to transform the Irish construction and property sector into a global leader in quality and sustainability. We are proud to work with an organisation that is so strongly aligned with our dedication to quality, sustainability and innovation.

Developed by the IGBC, EPD Ireland provides a platform for specifiers to source products with Environmental Product Declarations (EPD). An EPD is a standardised way of providing data about the environmental impacts of a product through the product life cycle.

Kingscourt Brick are pleased to be asked for, and supply EPDs for our products. We are proud and confident in the products we make and the buildings they are used to construct. For more information on the sustainable benefits of using our bricks, please contact our Technical Sales Team.

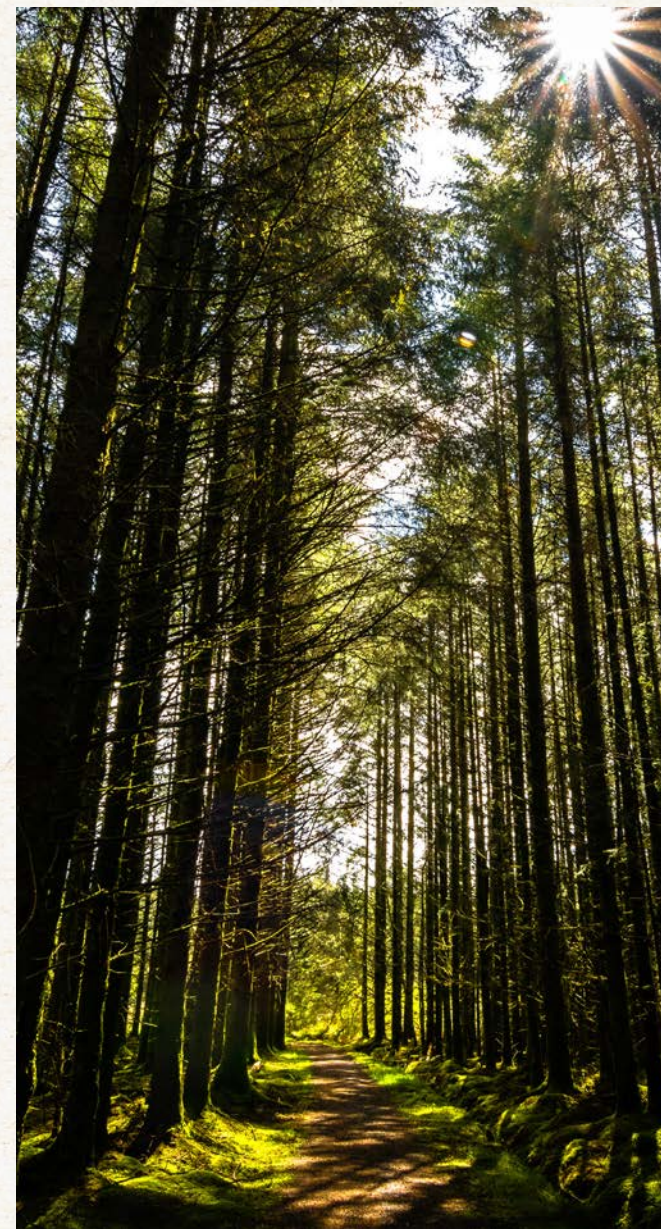

**We are incredibly proud of our Irish heritage at Kingscourt Brick. The Kingscourt site has been making bricks since 1915 and is now Ireland's last remaining brickworks.**

The Guaranteed Irish symbol helps consumers and businesses to identify products and services that are #AllTogetherBetter choices for communities across Ireland. We are also proud members of Ireland's first national listing of construction sector businesses based in Ireland, Guaranteed Irish House, a subsidiary of Guaranteed Irish.

**Creating benefits for climate, nature, wellbeing and communities nationwide.**

Kingscourt Brick are partnering with Guaranteed Irish, Coillte and Forestry Partners to launch a new biodiversity initiative, the Guaranteed Irish Forest. This project aims to encourage climate action engagement and increase biodiversity. The establishment of this forest will see 200 hectares of new, non-commercial native woodlands with free public access. Planted with native Irish trees, this forest will be managed and maintained by registered foresters to the highest standards for generations to come.

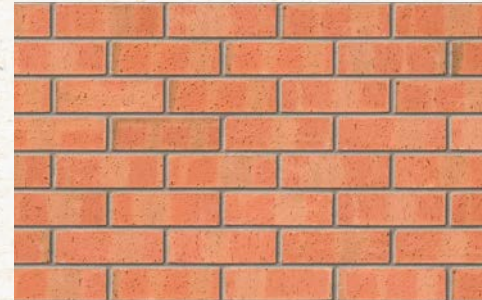

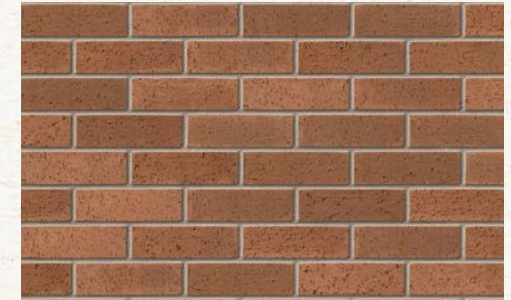

# INTRODUCING OUR TOP PRODUCTS

## Featured Kingscourt Brick Range

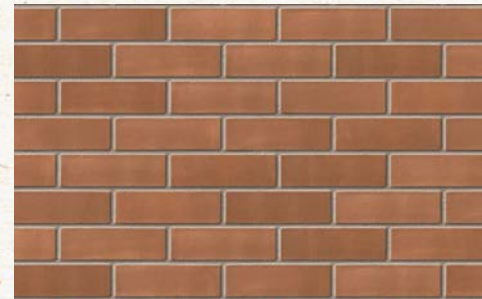

Our brick range offers a wide selection of high-quality, durable bricks in various sizes, shapes, and colors to suit any construction project. With options ranging from classic red bricks to modern designer styles, our range has something for everyone. Our bricks are manufactured using sustainable and eco-friendly processes, making them an excellent choice for environmentally conscious builders.

# HANOVER

The Hanover brick type has been produced for over 125 years at Kingscourt.

It faces marquee developments in all geographical areas and its longevity and quality can be seen to this day. Its ember orange tones and charcoal hearting were originally derived from the coal fired Clamp Kilns of Kingscourt. Our latest Kiln technology continues to harness these colours over a century later.

# BRICK INSPIRATION

## Making A Material Difference to our Places since 1882

As a company with over 140 years of experience in brick-making, Kingscourt Brick has seen and learned everything there is to know about bricks and their use in construction. From traditional brick structures to modern, innovative designs, our team has seen it all. We have learned through experience the nuances of brick-making, including the importance of using the right materials, the significance of proper mortar joints, and the benefits of different brick patterns. Here is some brick inspiration that showcases the beauty and versatility of this timeless building material.

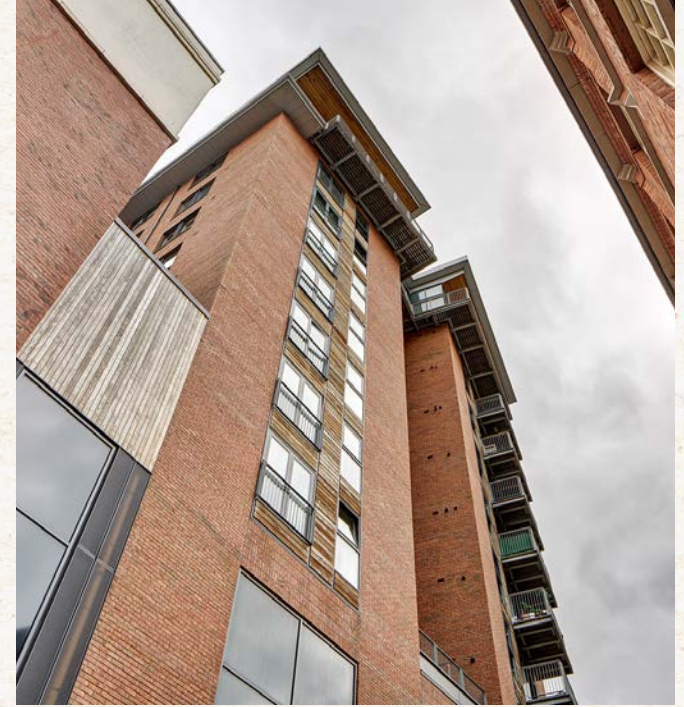

# BRICK BLENDING & MATCHING SELECTION

## Making A Material Difference to our Places since 1882

If you can't find your brick of choice or match an existing brick, we at Kingscourt Brick offer a specialised service where we will mix together different brick types of your choice to create your own personal and unique blend.

Brick blending allows you to select two or more brick types and combine them to create a new bespoke combination of bricks for your development. Different brick colours or textures can be mixed in varying percentages and are carefully hand-picked and packed to ensure they are perfectly tailored to your project requirements. This process means a wide variety of brick blends are available for architects, specifiers, designers and homeowners requiring something truly unique. We also offer a comprehensive brick matching service, delivered by our friendly, experienced staff and backed up with an extensive range of high quality bricks. We can provide specialist advice suited to your requirements based on your aesthetical, structural and budget restrictions.

## Cabra Road Blend - Hamilton Gardens, 2-4 Carnlough Road, CabraWest, Dublin.

A bespoke blend of Grafton (50%), Knoxton (25%) and Brown Knoxton (25%) for a range of 1, 2 & 3 bedroom apartments in Cabra, a central and established suburb in North Dublin City.

Meticulously designed and beautifully crafted, the use of this blend gives Hamilton Gardens a distinctive and traditional textured finish.

# BRICK SLIPS

## An innovative product new to the brick cladding market

Brick slips are a manufactured clay masonry product. When built, they have the appearance, colour, texture, longevity and resilience of a regular brick build.

There are a number of ways in which brick slips can be manufactured, from purpose made and extruded clay slips, moulded slips, to traditional cut brick slips made from real handmade and reclaimed clay bricks. Kingscourt Brick produce brick slips using the aforementioned processes. Our brick slip products are manufactured at high volume and in a range of aesthetics. Keeping up with our promise of being Ireland's Most Authentic Craft Brick Makers, this process in our opinion, gives you the most authentic looking brick product.

Using state-of-the-art machinery, we produce slips from 12 to 25mm in thickness, also available with keyway tracks, which benefit adhesion. Our brick slips are manufactured to extremely tight tolerances, are strong, require low maintenance, are non-flammable and have excellent resistance to adverse weather conditions.

# LET'S TALK ABOUT YOUR UPCOMING PROJECTS

The reproduction of colours and textures is only as accurate as the printing process will allow. Photographic samples should be used when short-listing products but we advise that an actual sample should be seen before ordering.

For full information and advice on materials for your project contact our team of project consultants.
